NFers Go South

The NFCCS 1962 Fall Congress was held this past weekend in Memphis, Tennessee, with Christian Brothers College and Siena College hosting the elaborate affair. Representing Marian were our co-moderator Mr. J. Divita, (Avid the Fair, as he is affectionately known) Miss Jeanne Vigue, Mr. John J. Day, and Mr. J. Denis Mercier.

This Congress served as our orientation week-end for those who were new to NF, in addition to charting NF's course for the coming year. All official business was swiftly and efficiently taken care of, and the group was then privileged to hear and discuss speeches by two nationally recognized experts in the field of Labor-Management relations, which is the chief topic for the current affairs branch of NF this year. In conclusion it would suffice to say that a good time was had by all (in more ways than one).

ACS

The Marian College chapter of the American Chemical Society is an outgrowth of the former M.C. Science Club and the Scotus Science Club. The Club received its National Charter in 1956 and has been meeting weekly ever since. Each month, a visiting chemist attends the meeting to lecture on the latest scientific developments.

Members of ACS have an opportunity to attend and to present research papers at an Annual Convention. For the past fifteen years student members of ACS have been participating in the Albertus Magnus Chemistry Club Annual Symposium held in greater Cincinnati. There are currently about forty members in the group. Club officers are:

Donald Bozic, Pres.
Sandy Hauk, Vice Pres.
Virginia Halter, Sec.
Jerry Trumpey, Treas.
Caron Cousins, Publicity Chairman

W.A.R.A.

The Women's Athletic and Recreation Association has as its purpose the promoting of fellowship and sportsmanship, and the furthering of athletic interests and activities among students. Awards are presented to students with the designated number of points, and a yearly award is given to an outstanding Senior.

Any interested students should contact: Carol Roell, Pat Goley, Pat Michael, Judy Farmer, or Mrs. Clark.

Random Thoughts

The courses here at Marian are quite extensive. What isn't covered in class is covered in the test,

BOTH IN OUR AUDITORIUM!

Two sheets of paper were found on the CARBON desk yesterday and were so interesting that we decided to publish them in all of their unpurgated glory:

Donna Dahling,

Congratulations, honey! Last week you really outdid yourself, sweetie! Your editorial was a bomb! All of your fans went wild over it, not to mention little ol' me. Gee, Donna, what stroke of fate has brought us together? Every time I gaze into your limpid blue eyes, my heart does flip flops! You're a gas, baby! What could I do without you?

Oh, by the way, dear, may I have the editorial space for this week? Your editorial will be hard to follow, but I'll try my humble best.

Your greatest admirer,
Denny

Dear Denny,

Whilst sitting in class today, pondering Honcysuckle Ginnsberg, the renowned political scientist, I noticed your stately head rising above the sea of insignificant faces. Suddenly it seemed as though the light from the window transformed you into a knight with armor reflecting the goodness and generosity, that is your essence. But these aesthetical qualities are not the only attributes that prompted this epistle. You're also endowed with abundant wit, good humor, and quickness of response. Today when Father accused you of sleeping in class, you furrowed your intelligent brow and jauntily angled your head so as to look him straight in the eye and cleverly and without hesitation said, "Aw, your Mother wears army boots." That was really cute, dear, and I could hardly control my mirth. Well, I could go on forever, but at the risk of making you vain, I will simply tell you that I'm going to take the editorial space in the CARBON this week. Thanks sweetie, I know you would understand.

With fanaticism,
Donna

And Now, Here Are The Ball Scores:

Rebels smashed Colts 32 - 0
Blitzers (hooray) bombed Animals 12 - 6
Tigers clawed Cards 26 - 6
Bears squeaked by Lions 20 - 19

Sunday's Schedule:

1:00 Blitzers vs. Lions
2:00 Animals vs. Tigers
3:00 Cards vs. Rebels
4:00 Bears vs. Colts

... Come out behind the tennis courts and watch the action!

The CARBON Applauds:

Nancy Kathman who is about to be an aunt.

Mike Hughes for not writing anything obnoxious in the CARBON this week.

The Student Board for buying new ping pong equipment for the lounge.

Pat Michael for devoting her time to type the CARBON in place of going to the W.A.R.A. picnic.

Bill Robinson, for finally getting his name in the CARBON after four years of attending Marian College.

Mr. Olson for delivering those interesting lectures on Japan.

The CARBON Hisses:

The "Hustlers" from Winfield Avenue.

Those juvenile students who had nothing to do but make a shambles out of the mixed lounge Saturday night.

The loss of color on the Marian campus - Ralph Hague's black eye.

Something to Pore Over

The saxophone was invented in 1840 by Adolphe Sax. It is not true that he was a disciple of Freud.
