Marian receives grant to mentor in the city

Kimberly Blair
staff writer

Marian College is requesting a planning session for one year to develop a full proposal for a Mentoring in the City Project. This project will prepare Marian College students to serve as mentors for one or two years in Catholic high schools. In turn the high school students will be trained to work with junior high students of the Urban Parish Cooperative.

The college is committed to the development of the whole person and the common good of all persons, both within and outside the college community. Marian is making an effort to work collaboratively with other Catholic institutions in creatively addressing some issues facing minority youths. College students are ideal project mentors as they mature in the realization

of their own understanding and commitment to personal religious values.

Selected college students can establish those relationships which will allow and encourage their proteges to fulfill their own dreams. Then the high school students will be motivated to establish that same role with elementary students. In turn, all concerned parties will grow in appreciation of each person's God-given dignity and responsibility to become a more productive human community.

The college will concentrate on the following five areas: training the advisory group and developing a vision, establishing the needs of the protege groups, establishing the needs of the mentor groups, developing an effective interaction model, and determining how this project dove-tails with the institutional goals.

CHRISTMAS AT MARIAN

ARA sends cookies to troops in Saudi Arabia

Marian College is participating in a project to prepare and send cookie "care" packages to the Persian Gulf in an effort to show troops that they are being remembered by those back home during the holiday season.

Organizing the nationwide project is ARA Services, which is in charge of food services at Marian. Inspiration came from another ARA facility -- North Adams College in North Adams, MA. Joyce Wilk, a chef at the school, has a nephew stationed at the Gulf, and he is fond of cookies. She whipped him up a batch and sent them over. Her nephew, Homer, liked them so much he asked for more. Wilk,

with the help of her co-workers, sent out 50 dozen cookies. Now students are becoming involved in a holiday project to send out even more.

By sending out "Gretel's" oatmeal raisin cookie recipes to every one of its food service locations, the company hopes to provide thousands of cookies to the over 350,000 soldiers stationed in the Gulf. Joining Marian in accomplishing this project are colleges and universities throughout the country, school districts, hospitals and continuing care facilities, as well as government and business institutions served by ARA.

*Merry
Christmas to all!*

Don't judge a college by its landscape

Where are our school's priorities? As far as I've seen during the past 3 1/2 years, they're out the door! Why is so much funding going into "landscaping" the grounds and putting up bricks that say "Marian College"? Sure, it would be nice to have several pretty signs and decorative lawns. It would also be nice to be able to drive from one building to another without having to leave campus to do it. But we can deal with it a while longer. As the cliché goes, "you can't judge a book by its cover." The inside is

what makes it a good book. I can find so many other things that need attention first. Our library is lacking in all areas. It doesn't contain sources needed to fulfill class requirements. The dorms are in desperate need of major repairs. The science labs need updating. Facilities in general need help. It's deceiving when something is beautiful on the outside but not on the inside. That type of beauty is not remembered.

-- Jeanne Lovins

Smoking policy unfair to commuters

The new smoking policy is completely unfair to commuter students. The policy states that smoking is only permitted in faculty offices or dorm rooms, assuming roommates and other faculty members do not object. Essentially, this policy discriminates against commuter students. As a commuter, I do not have an office, or a dorm room. Therefore, I must smoke outside. If I were faculty or if I lived on campus, I wouldn't have to go outside to smoke. It is completely ridiculous for some members of the college community to be allowed to smoke while others cannot. I admire the policy in purpose. To promote a smoke-free environment is very responsible for Marian. I think it can help those who wish to quit the habit. But in its current form it is completely unacceptable.

I urge the President to re-examine this policy. If I cannot smoke in any building in campus, then no-one else should be allowed to do so. I know this double standard policy has angered many commuter students. That is why we continue to smoke despite the regulations. Until it is changed and made fair to all members of the community, people will continue to disregard it. The purpose of the policy will not be realized.

As a smoker, I respect a no smoking policy, because I respect the rights of non-smokers for clean air. But until that policy is changed and made fair to all, myself and many others will neither respect nor support it.

Susan M. Williams
Vice President
Senior Class

Cheating in class

MARIAN COLLEGE...What does come to mind when you hear that name? Maybe a strong school which backs its students up and has a strong reputation of academic integrity? Those used to be my thoughts. I see them now as mere fantasy!! Earlier this year in the Non-West History class, I observed three baseball players cheating. They were passing 3x5 note cards among themselves. When the teacher walked around to observe, they hid them under their arm, leg, or test!! I was infuriated by what I saw!! I tried to contact the professor immediately to inform her of the situation. She said she would schedule a meeting for discussion. When I arrived at the meeting, I wasn't alone. Luckily another student saw the boys cheat and she wanted to tell her story, too!! Our teacher wasn't alone either. With her was the dean, assistant dean, and head of the history department. We began to tell our story. They all seemed so interested and concerned! But, as the saying goes, actions speak louder than words!! The only action taken, was to move them

closer to the front of the room! I am greatly disturbed by this!! I kept waiting to see what might happen, but still nothing has! How can we allow people to cheat? What is the use to be courageous and come forward if nothing is to be done? I don't blame the professor, for she can only do what the dean allows!! I am very ashamed the people of Marian College have allowed this to occur. Those of you who have cheated, I really feel sorry for you. Especially those of you who will be graduating with me in May. I sincerely hope you do succeed and that you can carry your 3x5 note cards with you after you graduate to help you out when you need to rely on knowledge that was supposed to be learned through college training. For those of you who see others cheat, I'm not sure what type of advice I can give you! I thought Marian College really cared, but I guess I was wrong. Cheating is acceptable and is what we allow our students to do!!

-- name withheld

Sleep should become a necessity during final exam week

by N.M. Gasco
staff writer

To sleep or not to sleep... that is the question facing many Marian students as exams draw ever closer.

Like myself, there are the students who work, attend classes and even have a social life (however limited it may be) and still manage to turn in assignments and take tests without suffering from a nervous breakdown. So why should exams upset this continuous balance of school, work and fun?

Because these "tests" involve an enormous amount of brain activity all at once, usually accomplished thanks to the miracle of caffeine. All students have, at one point in time, crammed for exams. "I'll study tomorrow" is a common phrase floating through Marian's halls followed by an "exams are DAYS away," which is the students' attempt to reassure themselves that there's still plenty of time to prepare.

Yet, somehow, even organized students like these find themselves face to face with the clock the night before the big exam. In these precious moments, as the hours slip by, the students teach themselves to speed read. By the time the final moment arrives, many of these students have had little, if any sleep.

But, how important is sleep really? It is one of the most basic of all human requirements. Psychological experiments done have shown that people who are deprived of sleep for any length of time often become irritable, anxious, paranoid, and unable to concentrate. Their hand-eye coordination decreases. Sleep deprivation, over a period of time, even increases our immune system's vulnerability when combating viruses or antigens. In fact, sleep deprivation was used and was powerful enough to break down many prisoners' resistance.

One student at Michigan State University found out the hard

way: "I tried to live 48 hour days. I stopped getting enough sleep and eventually it caught up with me." He became extremely run-down, contracted mononucleosis, and was forced to sit out a term to recover.

Taking a series of exams after being deprived of sleep for an extended period of time is about as productive as using a number 3 lead pencil. Instead of being smooth, allowing thoughts to flow effortlessly, it's so dull and hard that it requires great pressure to recall all the necessary detailed information. Just as the pencil breaks under pressure, so does concentration, sanity and health without proper sleeping habits.

What's the moral? In these upcoming weeks try to get some sleep and, as mother would say, eat a healthy well-balanced breakfast, some food for thought such as Fruity Pebbles. And when schedules become too hectic, don't be afraid to take a time-out from life.

Editorial

Security improves!

I would like to commend the security staff here at Marian. Earlier this semester I gave suggestions for improvement, many of which are in effect, or are in the workings right now. The thing I am most impressed with, though, are the people themselves. Before Vern was in charge of things, it was rare to see the chief anywhere but in his office. Vern is often outside patrolling and keeping an eye on things himself, instead of relying on his officers.

The staff as a whole seems to get along better and the communication seems to be improving. I was delighted to see an officer come

to the Carbon Office this week to check on us and make sure everything was alright. It seems, too, that the response time has gone down. I called to have someone come over and jump my car and they were there within two or three minutes. (Thanks!) I am really impressed because I have seen a real change of attitude in the staff and the way things are handled. Congratulations on a job well done. Keep up the good work, Vern!

CONVOCATION
Friday, 12/7, 10:00 a.m.

Survival in the
Global Market Place

On December 7 at 10:00 a.m., an all-college convocation will be held in Marian Hall Auditorium. Marian College and the Office of the Governor, with assistance from the Lilly Endowment, is hosting a select group of distinguished experts who will discuss the North American Common Market System. All students, staff, and faculty are encouraged to attend.

The Carbon, a source of news and information as well as an open forum for the Marian College Campus community, is not an official publication of Marian College and does not necessarily reflect the views of the college administration, faculty, or editors. Readers are invited to submit timely and relevant letters of opinion to the editors. Such letters should not exceed 150 words and must include the author's name and phone number. For verification purposes the letter must also be dated and signed. Telephone numbers will not be published, nor will anonymous letters be published. Letters may be edited for clarity and brevity. Editors have authority to reject any letter they feel to be potentially libelous, obscene, inflammatory, or in poor taste. Ordinarily such letters should aim to address issues, clarify events, promote understanding, or clearly identify what is going on in an event, issue, or scene. No guest editorials will be accepted unless explicitly solicited by the editors. Unsolicited pieces will be treated as letters to the editors. Letters to the editors must be turned in to the Carbon's mailbox in the faculty mail room by 12:00 noon, Friday, the week before they are to run.

Any campus club or organization sponsoring an event can advertise in the Carbon at no charge by submitting a 4"x5" ad to the Carbon in the Carbon mailbox in the faculty mailroom one week before the ad is to run. If typesetting is required, the ad must be submitted two weeks in advance, and a fee will be charged. The Carbon will run the ad for the two weeks preceding the announced event.

Events or informational notes can be submitted for the Nightly notes by campus organizations or persons. The text must be 50 words or less. The deadline for Notes is Fridays at 12:00 noon in the Carbon mailbox. The editors reserve the right to edit all advertisements and notes submitted.

FINALS' WEEK INSERT

These next four pages were put together by the production staff for your enjoyment during exam week. We survived the "earthquake" and with a little bit of laughter, studying, and a few miracles we'll also live through finals. Have a safe and peaceful semester break!

Senior Profile

N.M. Gasco
staff writer

Ever since she can remember, Debra Weed has wanted to become a doctor. She realized, early on in high school, that her desire to help people would lead her to Marian College due to the excellent reputation of its nursing program.

In her fifth year, her nursing class has a special place in Marian's history; it is the first class graduating under the BSN program offered this year.

As secretary and treasurer of the senior BSN class, Debra realizes the importance of maintaining goals in the face of challenges; "When people or things get me down, I try to look for the light at the end of the tunnel. I look ahead; I know where I want to be in ten years."

Part of this positive outlook includes her goal to move to St. Louis by April of 1992 and attend St. Louis University. There she plans to study perfusion (involving organ transplants) or

attend medical school to become an OB/GYN doctor, enabling her to deliver babies. She also looks forward to having children of her own, and she knows that by sticking to and completing the rigorous course, she will have the secure future and career necessary to successfully raise a family today.

For Debra, the biggest challenge college gave her was how to effectively organize her time. Throughout school, Debra worked at Methodist Hospital in surgery/recovery and also as a telemarketer at Lincoln Technical Institute. Work and studies, however, did not prevent her from getting involved in college activities.

She is, in fact, currently working with Herff Jones to come up with a new design for the nursing pin. The final three design sketches will be picked on January 16, 1991. Once chosen, all the nursing classes will vote and decide which design will represent their class.

When asked about priorities in her life aside from goals, Debra

Debra Weed

stressed family. "I am really thankful for my family, especially my mom who has shown me so much support and encouragement. I've learned as much about wisdom, guidance, and strength from her as I have from college."
