Education majors prepare to assist center city schools

by Karen Murphy

Some education majors have been given the opportunity to get experience, earn some money, and help underprivileged children in Indianapolis through a federal grant.

Dr. Susan Beesley, education, wrote a proposal to receive a federal grant that would enable the department to purchase math manipulatives for eight parochial center city schools.

The proposal includes plans to train Marian students so they can teach school teachers how to use the manipulatives.

The math manipulatives include colorful objects such as cubes and Cusinaire rods that will give these students hands-on math experiences. The inner city students are often minorities or come from low-income families. The program also

includes a monthly newsletter to the parents of the students.

Eighteen early childhood and elementary education majors were chosen to be workshop leaders. They were chosen on the basis of high math grades and ability to interact with people.

The Marian students will attend a 3-day retreat in May where they will be trained to use the manipulatives. Sr. Monica Zore will head the retreat.

In August, the students will instruct the teachers and principals of the inner city schools on how to use the manipulatives.

During the 1990-1991 school year the students will meet with 4 or 5 center city school teachers at least four hours each month.

Beesley is excited about the program, "I think it will do a lot of positive things for a lot of people."

Admissions chooses new staff

by Karen Murphy

Ten students have been chosen to serve as student assistants in the Admissions Office for the 1990-91 school year.

They will provide their services to the office for 5-10 hours a week. These students will report to school a few days early in August for an orientation to the jobs they will be doing.

The student assistants take on many duties in the office. They answer phones, do office work, and most often, make

arrangements for tours of the school.

They may set up the Golden Knights to take prospective students on tour and make appointments with professors and the Financial Aid Office to meet with these prospective students. The students who survived two interviews and were chosen to the 1990-91 staff are as follows: Sarah Baumann, Marlene Hartman, Rainy Bewley, Ted Minch, Karen Federspiel, Donna Sanders, Angela Fenoglio, Susan Traub, Lisa Harshbarger, and Stephen Tweddell.

Lilly supports mentoring program with financial grants

by Stacey Nicholas

Marian College has been given advanced notification of receiving two grants from the Lilly Endowment that total nearly \$210,000.

The first grant, \$75,000, is for the mentoring program proposed by President Felicetti during his inauguration.

The mentoring program proposes to emphasize mentoring as a means of providing a new level of support to the students. It entails training faculty members to assist students with academic, personal, and emotional development of the students.

The program also recognizes the need of faculty members to continually update their knowledge in their field and to be professionally competent to be good mentors.

Sr. Norma Rocklage, executive director of planning and mission effectiveness said, "This grant will enable us to get our mentoring program off the ground." She envisions the program to later encompass not only the faculty and some of the professional staff, but upperclassmen as well.

The second grant, \$135,000, will be used

to activate Phase II and III of the Indiana Catholic Principals Institute.

With the steady growth in lay leadership in Catholic Schools there is no longer a common spiritual formation of the school as there was when religious congregations administered the schools. This program attempts to create a spiritual formation model.

Phase I was held this past fall for first and second year principals. Phase II would be held for veteran principals and Phase III is designed for pastoral teams. Pastoral teams, pastors, principals, and the directors of religious education, need skills in developing and maintaining a collaborative ministry.

According to Sr. Norma, Marian is the only college in the United States to develop a program that trains Catholic school principals how to be spiritual leaders in their schools. The program will train the principals who work in the five dioceses of Indiana.

The school is awaiting official notification from the endowment.

In the news

Professor Robert Pohill was released by his Shiite Kidnappers after 39 months of captivity in Lebanon. He is the first U.S. hostage released since Nov. 2, 1986,

About 170 people were charged with alcohol-related offenses during Indiana University's Little 500 Weekend. One-third of those arrested are expected to be I.U. students. Seventeen alcohol-related arrests were made at Purdue during its Grand Prix Weekend. (Both events were held April 20-22.)

Chinese Premier Li Peng began a historic visit to the Soviet Union on 4/24. It is the first visit by a Chinese head of government to the Soviet Union in 26 years. The four day trip is intended to promote normal relations and focus on easing border tensions between the two communist powers.

Letters to the editor

Previous editors respond

As former editor of The Carbon and staff writer for three years, I have earned the right to reply to your letter to the editor printed in the April 19, 1990, edition of the newspaper.

Having put 25 to 35 hours per week into producing a newspaper for the students at Marian College in 1989, I know the work, time, frustration, and, yes, blood, sweat, and tears it takes to put out the kind of product you want to see. Having also worked the past summer and during school vacations for the newspaper published in my hometown, I know that opinion has a very important place in a newspaper and that editors respond to letters when he or she deem the situation as warranting a response.

I made a commitment three years ago to give my time and talents to the project of producing a newspaper for this campus because I enjoyed the work and felt I had something of value to offer. I wanted to be a part of Marian and make a difference. I have done that.

Recently, after Dallice Hesselgrave took over the editorship of the paper, I decided to put some time into other projects that are of interest to me, such as student government, my job in the Office of College Relations, and my classes. I felt that Dallice did not need my presence over-influencing her while she developed her own style of running the paper. I needed a change of pace and took some time off from The Carbon. But I will probably go back again soon, if they will have me.

Now I read a letter from someone, who has not come forward to dedicate her time to The Carbon, criticize the work of a person who has been dedicated. I am disgusted when I see one, who has not tried to accomplish a task, publicly or privately humiliate a person who takes the initiative to try.

If you have ideas and constructive criticism, put them to use by offering your time to the paper. Obviously you are somewhat literate, because your letter is coherent. You do need to improve your investigation skills and relation of facts, but I see potential.

I hope you take some advice from someone who has been there. The Carbon has influenced Marian College. It will always be there.

-- Tina Kunkler

Having served as the editor of the Carbon for two years, I believe that I possess some insight into the strengths and weaknesses of this paper. I would like to take this opportunity to respond to Kristine Abel's April 19 letter to the editor.

First, I concede, as does most of the staff, that the paper could (should) be a better publication. But remember that the key words on the masthead are "student publication." It is a learning tool, where skills are taught. Mistakes are part of that learning process.

Unlike the other Indianapolis college newspapers, ours is not supported by the framework of a journalism department. The college catalogue offers only one course in newswriting. Few staff writers have professional experience and neither advisor nor editor have worked on a newspaper. The writing staff is completely volunteer. They receive no academic or financial compensation for the hours that they spend working.

Numerous times in the past three years, the Carbon has asked what the readers would like to see more of and the response is always more cartoons.

As for her comments on editorials, it is apparent that Ms. Abel has never worked on a publication that has no editorial board. In college newspapers that have no official editorial board (a board responsible for setting the official editorial policy of the paper), editorials are signed. The signature of the editorial writer attempts to ensure that the piece is not perceived as newspaper policy.

Unfortunately, some members of this community fail to comprehend that they themselves have a responsibility to improve their newspaper. This can be done through writing stories, proof reading, typing, and letting the newspaper know what activities the clubs and organizations are doing.

Ms. Abel, if you are truly concerned about contributing to the college newspaper, I personally invite you to join the staff. We meet on Monday's at 3:30, in Kavanaugh Hall.

--Stacey Nicholas

Thank you, Nadeem

I would like to personally thank Nadeem Saddiqui for his help Saturday evening during the "Last Chance For Romance" dance. Due to the early arrival of the submarine, I needed to store 26 feet of sub somewhere. Nadeem gladly allowed us to use ARA facilities; not just the refrigerator but the ice machine as well. Thanks to Nadeem and everyone else who made partying so easy!

-- John J. Mathis

The Carbon, a source of news and information as well as an open forum for the Marian College Campus community, is not an official publication of Marian College and does not necessarily reflect the views of the college administration, faculty, or editors. Readers are invited to submit timely and relevant letters of opinion to the editors. Such letters should not exceed 150 words and must include the author's name and phone number. For verification purposes the letter must also be dated and signed. Telephone numbers will not be published, nor will anonymous letters be published. Letters may be edited for clarity and brevity. Editors have authority to reject any letter they feel to be potentially libelous, obscene, inflammatory, or in poor taste. Ordinarily such letters should aim to address issues, clarify events, promote understanding, or clearly identify what is going on in an event, issue, or scene. No guest editorials will be accepted unless explicitly solicited by the editors. Unsolicited pieces will be treated as letters to the editors. Letters to the editors must be turned in to the Carbon's mailbox in the faculty mail room by 12:00 noon, Friday, the week before they are to run.

Any campus club or organization sponsoring an event can advertise in the Carbon at no charge by submitting a 4"x5" ad to the Carbon in the Carbon mailbox in the faculty mailroom one week before the ad is to run. If typesetting is required, the ad must be submitted two weeks in advance, and a fee will be charged. The Carbon will run the ad for the two weeks preceding the announced event.

Events or informational notes can be submitted for the Knightly notes by campus organizations or persons. The text must be 50 words or less. The deadline for Notes is Fridays at 12:00 noon in the Carbon mailbox. The editors reserve the right to edit all advertisements and notes submitted.

Spring comedy
opens this
weekend

The Marian College Department of Theatre will present Noises Off April 26-29.

Noises Off features a bumbling theatre company whose actors forget their lines, miss their entrances, lose their props, and generally turn their performance into chaos.

This comedy enjoyed a long run on Broadway and will be performed in Peine Arena Theatre, Fisher Hall. Curtain is at 8:00 p. m.

To make reservations please call 929-0292 and leave your name and number of tickets needed. Tickets may also be acquired the night of the performance. Marian students, faculty, and staff are admitted free of charge.

R.A.s assigned to residence halls

by Stacey Nicholas

The residence life staff selected fourteen students for next year's resident assistant (RA) staff.

Working in Clare Hall will be De De Amstutz, Amy Marksberry, Yvette Wade, Michelle Woods, and Heather Honan.

Honan currently works in Clare Hall.

Rob Deems, Tina Kunkler, and Beth Peters will share the duties in St. Francis Hall. All three students are new to the residence life staff.

Doyle Hall will be staffed by Kyle Brenner, Lee Ann Bessler, Kent Cook, Heidi Hansen, Denis Ratekin, and Jeremy Vogt.

Ratekin and Bessler currently work in Doyle Hall. Hansen will be moving to Doyle Hall from Clare Hall.

When asked about her switch to Doyle,

Hansen responded, "I just wanted something different for my last year. You know, a change of scenery type thing."

Ratekin has been an RA in Doyle for the past two years and says that he "enjoys working with the students, particularly the counseling aspects of the job."

Freshman Jeremy Vogt believes he can bring consistency to the hall staff. "The main thing is to have a consistent attitude, not to be biased towards people because students don't appreciate it."

This year's prospective RA's attended a group experience to measure how each person contributes to a team. Following the group experience, they were interviewed by the resident director of each hall and the director of resident life.

RA's will begin training the week before classes begin.

New trustees appointed

by George Spaeth

Over the past academic year, seven new members of the Board of Trustees have been appointed. Each has distinguished himself or herself through activities in the community. The list includes two Marian graduates.

Last fall, William Bindley, John Gray, Jr., Mark Mauer, M. Lynne O'Day, and Joseph Smith were appointed to the Board. This spring, Barbara Cooling and Robert Decraene joined their numbers.

Bindley, a part-time faculty member at Georgetown University, is a director of Ameritrust Indiana.

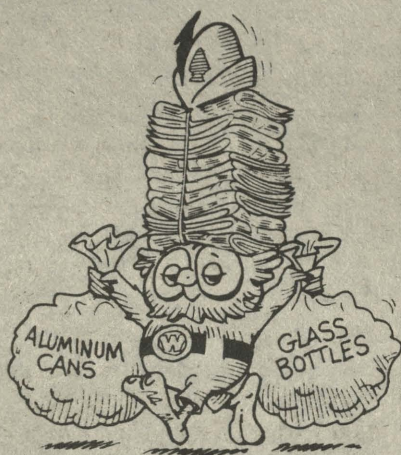

Gray is CEO, president, and director at Capital Industries Inc.

Mauer works for Richard Paul and Son as a sales manager. O'Day is a vice-president at St. Vincent Hospital and Healthcare.

Smith is chairman of the Indiana Parole Board.

Cooling is a civic leader at the Indianapolis office of Coopers and Lybrand.

Each will serve a term of three years on the Board.

Earth Day

April 22 marked the 20th anniversary of Earth Day. However, this was just the beginning of a long term commitment to protecting and sustaining a healthy planet for all of its inhabitants.

Dr. Steve Kristoff, biology, reminded the Marian College community that the commitment to the environment should not end on Earth Day. Many Marian students and faculty have planned a number of events to increase environmental awareness and continue to serve the environment.

Included activities are recycling aluminum products and distribution of informational flyers.

Saturday, April 28 will be a college clean-up day and tree planting. Anyone interested should meet in front of St. Francis Hall.

sponsored by the Senior Class

Senior profile

by Kimberly Blair

Seniors Kenny Richards and David Shaw have been roommates for two years. According to Shaw, they met the day of school in color group yellow and both thought it was absurd.

Richards attended Rushville Consolidated High School. He is a Spanish major with a chemistry minor. Richards is involved in the Marian College Walk for Fitness Club and the Physics Club.

Shaw attended Shelbyville High School. He is a chemistry and biology major with a minor in computer programming. Shaw is president of the American Chemical Society. He is also a member of the Biology Club and the Nerf Sports Club.

Here are the questions posed to the seniors and their answers:

Question: What are some things about your roommate some people do not know?

Richards: Contrary to popular belief, he is open-minded.

Shaw: Kenny has a rare talent of being able to immitate many character voices including the little martian on Bugs Bunny, Jimmy Stewart, and a number of professors on campus. He has fooled a few freshman into turning their lab reports in a week early.

Q: How did you choose Marian?

R: Small school, room to grow on your own, the teachers care about students.

S: I decided to go to Marian when I found out I got a hefty scholarship...financial reasons.

Q: What do you think of Marian?

R: Some of the teachers with whom I've had contact have contributed quite positively to my education and my desire to be educated. Apathy abounds in many areas here but it is possible in this personal college to both seek out positive elements and make a difference in changing apathetic attitudes.

S: Some people have said that Marian is an easy school. Something like that is difficult to judge. The only certainty is that one gets out of school what one puts into it.

Q: What do you see in the future of the college?

R: The president in cooperation with the present administration has made visible improvements. I am not a fortune teller...I am cautiously optimistic that positive

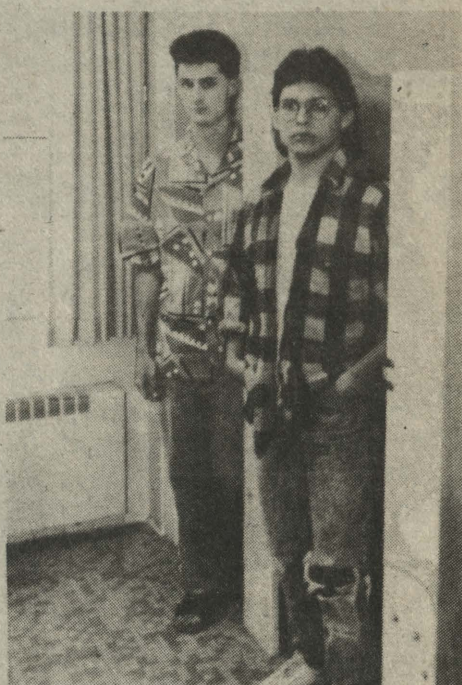

photo by T. Snyder

change will continue.

S: no response

Q: What do you do in your spare time, any hobbies?

R: Model rocketry, cultivate insectivorous plants, soccer and reading short stories.

S: Photography, mythology and ancient civilization, Saturday Night Live. I am an avid follower of RUSH.

Q: Have you ever traveled or studied abroad?

R: Spent time in Argentina, 5 months; Uruguay, 2 weeks; and Brazil, 2 and a half months.

S: I spent a few weeks visiting the ancient ruins in Italy and Greece.

Q: What do you plan to do after graduation?

R: Hoping to go to grad school at Purdue.

S: Hope to get into a graduate program in molecular biology at Purdue.

Q: Is there anything you would like to add?

R: "Give and take the best you can" -- Triumph lyric

S: I owe 99% of my success to Janice Rennekamp I will miss the wetlands, kicking the soccerball with Kenny and Gary Zamber. The biology raft and the ice cream races.

Earth Day Solutions

Energy Solutions:

- Use public transportation; carpool; bike; walk.
- Invest in ample insulation, weatherstripping and caulking.
- Use electricity and hot water efficiently.
- In winter, turn down your thermostat a few degrees, especially at night and when house is empty; wear warmer clothes. In summer, if air conditioning, turn thermostat up a few degrees.
- Close off and do not heat or cool unused rooms; use insulating shades and curtains on cold winter nights and hot summer days.

Food Solutions:

- Consider how production of your food affects the environment.
- Eat lower on the food chain — vegetables, fruits and grains; decrease consumption of meat and animal products.
- Read the labels on food; buy foods that have not been heavily processed; learn which additives are harmful.
- Support laws that ban harmful pesticides and that require disclosure of pesticides, drugs and other chemicals used in food production; support markets that offer contaminant-free food.
- Avoid food from endangered environments, like rainforests.

Water Solutions:

- Install sink faucet aerators and water-efficient showerheads; these use two to five times less water with no noticeable decrease in performance.
- Take showers, not baths, to cut water consumption.
- Do not let water run when it's not actively in use while showering, shaving, brushing teeth or hand washing clothes.
- Use ultra low-flush or air-assisted toilets, saving 60-90% water; composting toilets use no water and recycle organic waste.
- Buy phosphate-free, biodegradable soaps and detergents; ask your supermarket to carry them if it doesn't already.
