

The CARBOON

#21 + HAPPY 23RD TO MIKE HUGHES!!! - 3-15-'63

Results of Student Board Meeting 3/13

1. Coin Changer (50¢) has been installed in the Mixed Lounge.
2. The Student Association Fee raised \$2 (\$1 per semester). This money will be used to pay the Class Dues. The Board feels this raise will alleviate the cronic problem of 1/3 the class supporting the class, it will also provide the classes with more money to work with.
3. The M-Club has taken over sponsorship of the Pep Band. The M-Club has also agreed, since its Promotional Film has fallen through, to help the Board's Slide Promotional Committee so that instead of a Promotional Film Marian will have a Promotional Slide Collection which will be ready to show this year.

Other action has been taken but as yet it is not official.

FUNGUS AMONG US

A great loss has hit the Marian Biology Dept. Since semester break the double boiler has been missing from the stove in the student board room. This may not seem important to some but this boiler was used for melting agar, preparing culture media and other vital procedures. Anyone with information as to the where about of the implement should report to Sr. Marie Bernard. The lives of 2 million Pseudomonae and Bacilli depend on you.

NEWS BRIEFS

Director Tom Widner has announced the cast of Edward Albee's The Zoo Story: Jerry-Mike Cancilla Peter-Denis Mercier.

There will be a meeting of all interested trackmen today! 12:10 in the gym.

A PLEA FOR ACTION

Next week will be the start of our second personal patrons drive for the MARIAN. Why are we having another drive? The results from our drive held last December were so inadequate that the second drive is made necessary for us to bring in additional badly needed revenue.

The MARIAN is YOUR YEARBOOK! It is a pictorial history of Your College - it tells about the things that YOU participated in -- it will be a book which YOU will save and reread for many years to come. But the costs of bringing out a good publication are such that the regular commercial advertisements simply do not cover them.

For that reason, we are asking that each of you - without exception - constitute himself as an ad-salesman and bring in to us just two personal patrons. The cost to these patrons is only \$2.00. But if YOU will bring in your \$4.00 worth, and each of the other 600 students will do the same, our advertising income will be increased by a total of \$2400.

We appreciate what was done by just a few students last December. But now it is time for all the rest of us to take a hand and show that we really have an interest in bringing out a good MARIAN. Can we depend on You!

WHAT DOES MARIAN COLLEGE NEED?

This is a survey of Marian College students' views concerning the improvements of the college. We are prone to criticize other peoples' efforts. Have you ever stopped and asked yourself: WHAT HAVE I DONE TO IMPROVE MARIAN COLLEGE?

"Students awareness of Marian activities, or better still, an awareness of the importance to attend and support school functions, would improve Marian's all-over school spirit. Student apathy is one factor belying the poor attendance at school functions."
- Judy Della-Penna

"Marian College is it's students. The reform that I would like to see, therefore, is one in the student body. The basic gripe of most students seem to stem more from their own attitude towards the school rather than from deficiencies among the majority of students: more student interest in their own student board, more participation and leadership in college sponsored activities and clubs. Even a men's dorm and a new library won't change Marian much if the students are uninterested and inactive."
- Mary Ellen Babcock

"I think a little more participation in school activities would be helpful, especially from those who sit on their gluteus maximus and criticize the ones making efforts. For example, a few more boys out for sports, a few more people on the Phoenix and the yearbook staffs and a few more trying out for the various theatrical productions put on during the year." - Dick Phillips

"Better Library is what I want, and a bigger gym." - Judy Henry

"It is estimated that each year two Marian graduates enter mental institutions. It seems these cases might be eliminated if Marian offered some type of guidance program. We have counselors--qualified to deal with our academic problems--and priests to deal with our spiritual needs and problems. Should our problems be of a psychological nature and not related to academic courses or sin, we have no qualified personnel to turn to."

"There should be a psychiatrist affiliated with Marian College. A full-time psychiatrist should be a goal for Marian, but at present she should concentrate on the intermediate goal of a part-time psychiatrist. Perhaps it would be possible to incorporate the psychiatrist at St. Vincent's Hospital." - Betty Medes

"I think the school needs some changes in the curriculum, to modernize some fields and to eliminate repetition in other instances. I also feel some improvement can be made in the faculty or their teaching methods." - Beth Sutherland

Survey taken by:

Sandy Chan, Cathy Hunger, Sally Myers, Connie Widolff, and Jane Ying
