Fond Farewell

Thanks for the memories
of visits to the Dean
because we were "obscene".
Those talks with good ole Fred
the one's we'd always dread.
Oh Thank you - SO MUCH

Thanks for the memories
of Dr. Gatto's note
the one we always quote.
It got so much publicity
that Dynamic Catholicity.
Oh Thank you - SO MUCH

Thanks for the memories
of all those new G.I.'s
they're such swell, wonderful guys
They bring in all that dough,
but have no brains to show.
Oh Thank you - SO MUCH

Thanks for the memories
of drinking every night
with all those Maids and Knights.
They wouldn't condemn that booze
if they were in our shoes.
Oh Thank you - SO MUCH

Thanks for the memories
you pass Conduct Appeals
when Dean Brames squeals,
after pressure from the Board.
Curse the devil and praise the Lord.
Oh Thank you - SO MUCH

Thanks for the memories
of Sister Carol's decisions
on the Self-Study Commission.
Their work has taken its toll
Let's flush it down the bowl.
Oh Thank you - SO MUCH

Thanks for the memories
of all those rash decisions
ignoring students' positions,
demeaning their petitions.
Will this help admissions?
Oh Thank you - SO MUCH

... AND SHOVE IT!

Seriously, though, we owe a lot to several people who have devoted a lot of time to helping us with the Carbon. The paper probably would not have gotten out on a number of Fridays had it not been for people like John Costerison, Rich Vanes, Dave Stark, Steve Hammerle, Carol Luthman, and Diana Ryker. To these people, and to all our contributors, and the many people who have just stopped by to visit on Thursday nights--Thanks...for the memories.

FROM THE MASSES:

page 2

To the M.C. community:

A recent poll of faculty members, regarding the calendar for next year, shows that of the 47 persons who responded, 34 preferred the new calendar with 50 minute class periods.

If you take the time to sit down and figure this out (which I did), you will discover that such a system would mean that during Fall semester, a 3 hour course which meets on Monday, Wednesday and Friday, will meet a total of 39 times. The same class, if held during the Spring Semester, will meet 44 times. Thus, if a student were to take, for example, Developmental Psychology, in the Fall, he would attend 39 classes, each one for 50 minutes. If a student were to take the same course in the Spring, he would attend 44 classes, each one for 50 minutes. In either case he receives 3 hours credit for a course in Developmental Psychology.

I can imagine several different reactions to this. Some students may rejoice and take Developmental Psychology in the Fall. Some teachers may wonder how to teach the same amount of material (3 credits worth) in two different time segments. But probably most people will say, "Who cares?"

My reaction is to ask some questions. How can Marian College offer two semesters of unequal length and give equal credit to both? Granted, 5 class periods may appear to be a small number, but if consideration is given to the number of students, the number of teachers, and the number of classes offered each semester is 5 class periods really a big number? Did the 34 faculty members who chose this option consider the above and decide that this is not a real problem? If 39 class meetings are enough, then why not shorten Spring Semester to the same length? Are 38 class periods enough? Or 37?

I do not expect any answers to the above questions, of course. My intent is to express concern about this particular issue and also to raise a much greater issue of how do people arrive at the decisions they choose.

To You:

Well kiddies, it's time for another episode in the continuing story of this year's freshman class president. All year, long tall Eddie has been the butt of everybody's remarks. Criticism has been plaguing him since the election. Can't say he hasn't deserved most of it, but if there is one thing he doesn't deserve, it is his latest suffering.

Now kids, if you can stretch your minds back to last December, Eddie Krusa played a practical joke that cost him his job and the freshman class lost a not-so-illustrious president. He hid a term paper from a fellow student. The paper was returned before the due date and no harm was done to the student's grades, but never the less Ed was placed on Social Probation. Now there is a rule that a person on probation can not hold an office. This is a good rule when it is properly applied, but I ask you, where is the justice when the freshman lose their president on account of such a harmless, though childish prank.

(cont. col. 1- page 3)

Some may say "no big loss", but that is not the point. Ed Krusa was elected president by the freshmen and now the administration has taken the elected freshman class president away. No matter how poorly the job was done, we are left without the president of our choice.

Happy Trails,
Bill Platt

Come here to me, my merry
merry men,
Said a sergeant loud and clear;
And the young men all were
very merry men,
And they all came running near,
And the flag flew in the air,
And the drummer drummed
his share,
And the sergeant spoke of
Liberty
And pay and opportunity,
And the boys cried out

HELL NO!
WE WON'T GO!

NEVER PLAY ROULETTE WITH YOUR
HEALTH. CALL US & WE'LL TEACH
YOU POKER.

Greetings health fans!

Being young healthy students made possibly only through your dedicated and competent medical staff you certainly do not ponder the ominous and probable health conditions of old age. So to help combat this, we suggest prevention and cure to allay this senile sequelae by the following gerontological goop:

1. Take care of yourself. Don't drink or stay up past 7:34. This way you can create a good habit for the later years.
2. Think juvenile. Keep rattles rattling pacifiers moist and stereos blaring till 3:00Am
3. Partake of the fountain of youth, It has been relocated from the private garden of Ponce de Leon to the third floor drinking fountain of the Scotus Science Wing. This playful philter may not stop aging but it will sure make you feel like a dumb little kid when you try it.
4. Refrain from reading stuff like this, It will reduce brain cell deterioration by 92%.
